Non-surgical Cosmetic Treatments

Botox®

If you are unhappy with your frown lines, crows feet or forehead wrinkles, Botox® may be for you. Facial lines are caused by the repeated use of the underlying facial muscles which, over time, results in a permanent crease or wrinkle. As an alternative to surgery, it is possible to reduce these lines by blocking the action of the underlying muscle. It is a quick, safe treatment. Small quantities are injected painlessly into the muscles which block the signals to contract thereby achieving a softer, more youthful look.

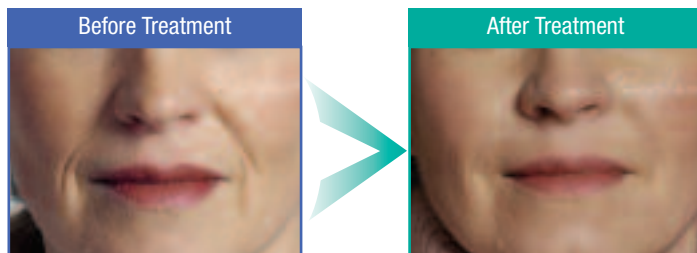

Dermal Fillers (Restylane®)

Would you like to enhance your looks with fuller lips or softer facial lines? Restylane® can safely achieve this.

Restylane® is a gel form of hyaluronic acid, a naturally occurring substance. A simple injection of Restylane® replenishes the lost volume and improves your looks by enhancing your facial profile.

All unwanted facial lines can be softened with Restylane® products (including Perlane). Lips can be safely treated to provide fuller appearance or defined shape without risk of a 'trout pout'.

Restylane Vital® hydrates and moisturises from within improving skin tone and elasticity, reversing the tell-tale signs of ageing.

All areas that give away your age can be treated including your face, neck décolletage and the backs of your hands.

Sculptra™

Sculptra™ is an injectable treatment that gradually stimulates the body's own collagen to smooth lines and wrinkles, provides more volume in hollowing areas and lifts sagging areas. The result is a fuller, lifted, younger looking face. Once the treatment plan is complete (normally 3-4 months from the first treatment) the results can last for 3 years.

TCA Skin Peel

Most people who have sun damage such as multiple solar keratoses, pigmentation abnormalities, certain types of acne, and fine wrinkling might benefit from this treatment. It is often used to treat fine lines under the eyes and around the mouth. Wrinkles caused by sun damage, ageing, and hereditary factors can often be reduced with this procedure.

PRICE LIST

Botox®	
One area	£200
Two areas	£270
Three areas	£320
Restylane®	
0.5ml (half syringe)	£200
